

FOAM INSERT UNIT WITH 5 COMBINATION SPANNERS

Réf.: **9801005001**

Characteristics

27 to 32mm. In two-tone foam module 385 x 165 mm. Each tool has a defined place. Missing tools can be spotted in seconds thanks to the red background. High density two-tone foam, does not break, does not retain moisture and is resistant to workshop products. COMBINATION WRENCHES Forged steel alloyed with chrome and vanadium. Its controlled heat treatment gives it the hardness to withstand heavy stresses. The openings of the keys are made by broaching, a technology which makes it possible to obtain very precise dimensions with a quality surface finish. The profile of the polygonal heads has been specially designed not to dull the angles of the nuts. During the effort, the pressure is not exerted on the angles but on the sides of the nut. The resistance of the Mob keys is far superior to the specifications of the ISO standards. Resistance much higher than the standard. Comfort of use: body of the non-sharp ergonomic key, allowing a good grip. Reliefs and soft markings made in cold forging for tactile comfort and easy cleaning. Recovery angle of 30° . 15° inclination allowing use in narrow environments.
