

COMBINATION WRENCH SET IN A CASE Réf.: 9000012001

Characteristics

COMBINATION WRENCHES: Chrome-vanadium alloyed forged steel. Controlled heat treatment gives it the hardness to withstand high stresses. Key openings are made by broaching, a technology that enables very precise dimensions to be obtained with a high quality surface finish. The profile of the polygonal heads has been specially designed to avoid damaging the corners of the nuts. When force is applied, the pressure is not exerted on the corners but on the sides of the nut. The strength of Mob wrenches far exceeds ISO standard specifications. Strength far superior to the standard. User-friendliness: ergonomic, non-sharp wrench body for a secure grip; soft, cold-forged reliefs and markings for tactile comfort and easy cleaning. 30° pick-up angle. 15° inclination for use in tight spaces. NF ISO 1711-3318-691 / DIN 899-3113. Made in our factories.
